

PRESS RELEASE

Directed-Perception High-performance Low-cost Pan&Tilt Platforms

Evry, Head Office

BFi OPTiLAS is distributing in all Europe the Pan&Tilt Platforms made in USA by Directed Perception. The Pan&Tilt devices can be used for multiple usage like computer-controlled positioning of lasers, microwave antennas, thermal cameras, video cameras, IP cameras, and more for harsh all weather environments.

Directed Perception's pan & tilt devices offer high speed, precision, durability, and small form factors. Directed Perception serves systems integrators and OEMs in mission-critical applications including surveillance, sensor fusion, automated detection and tracking, robotics, communications, border security, and automated test in military and aerospace.

There are currently 3 models, the PTU-D47, very small form factor, which can handle up to 4kg payload at speed up to 300°/second, the new PTU-D100, compact form factor, can handle up to 10kg payload at speed up to 150°/second, and the PTU-D300, medium form factor, can handle up to 20kg payload at speed up to 100°/second. All 3 models are available with the 360° continuous rotation (slip-rings), Low-cost 3-axis gyrostabilization, Geo-pointing module / GPS and IP-network interface.

About BFi OPTiLAS

BFi OPTiLAS is a pan-European technical distributor of specialist products and services, including design-engineering support, to the electronics and Photonics markets. BFi OPTiLAS focuses on niche technology products such as magnetic, lasers, sensors, connectors, electro-optics, imaging, fiber optics, RF & microwave and other specialty components, systems, assemblies and metals. Some 310 sales engineers and other staff are employed at 12 offices throughout Europe.

BFi OPTiLAS International SAS, 4 Allée du Cantal, CE 1834, 91018 Evry, France.
