## Liteye's OLED Based LE-700 & LE-750 Head Mounted Displays.

Evry, Head Office

Liteye's new LE-700 non-see-through and the LE-750 see-through Head Mounted Displays are now available from BFi OPTiLAS. They combine Liteye's patented prismatic optic with easy-to-use universal mount and utilise OLED Microdisplay for power efficiency and ready operation, even in extreme heat and cold.

The universal mount allows the user to position the HMD precisely for conformable viewing. Simply loosening a single knob enables the easy adjustment of the full mount. The prismatic optics provides the clearest image and the greatest eye relief of any product in its class.

The LE-700 & LE-750 deliver full SVGA resolution in analogue RGB and NTSC / PAL. The combination of proven microdisplay technology with new optics and universal mount has resulted in Liteye's most versatile display solution yet. These new products compliment the already existing LE-600 fully ruggedised head mounted display.

The Liteye family of head mounted displays has proved its utility and performance in diverse applications such as thermal imaging cameras, portable medical equipment, weapons systems, and dismounted soldier programs globally.

### **About BFi OPTiLAS**

BFi OPTiLAS is a pan-European technical distributor of specialist products and services, including design-engineering support, to the electronics and Photonics markets. BFi OPTiLAS focuses on niche technology products such as magnetic, lasers, sensors, connectors, electro-optics, imaging, fiber optics, RF & microwave and other specialty components, systems, assemblies and metals. Some 310 sales engineers and other staff are employed at 12 offices throughout Europe.

BFi OPTiLAS International SAS, 4 Allée du Cantal, CE 1834, 91018 Evry, France.
